

LIGHTHOUSE

Lab Services

Making Quality Lab Testing More Accessible

ABOUT US

Lighthouse Lab Services is a trusted partner of medical laboratories across the country. Our team consists of more than 150 experts, including 12 PhDs. Whether you are looking to start a lab or grow your current business, we offer you ways to accelerate your laboratory's success. Here's how:

MANAGED LAB SERVICES

- Unmatched access to our in-house team of experts for day-to-day technical and operational support.
- Supply procurement and vendor management allow for lower-cost supplies, custom standards, and reagents.
- Quality management including CLIA, CAP, COLA inspection preparation, web-based quality modules, and staff support.

RECRUITING & STAFFING

- Permanent and temporary recruiting from our nation's largest lab personnel database.
- Our experienced team specializes in placing qualified professionals from technologists to management and C-Suite.
- Cost-effective solutions for part-time and full-time Lab Directors and Pathologists.

INSTRUMENT SERVICES

- Instrument setup and maintenance using OEM and FDA-certified engineers and components for enhanced operational efficiency.
- Customizable contracts for chemistry analyzers and LCMS instruments, featuring experienced engineers, emergency support, and OEM-standard maintenance.
- Preventive maintenance coupled with expert training for equipment operation and comprehensive installation services.

REVENUE CYCLE MANAGEMENT

- Lighthouse offers the nation's leading RCM management, consulting, and auditing services to ensure accurate coding and minimize denials.
- RCM Payer Solutions specializes in payer contracting, credentialing, and negotiation services for all provider types, with an emphasis on pathology and medical laboratories.
